

prime PEP

Duty rosters and property protection services software
for Security Service Providers

The right staff at the right place and at the right time

A company's most important resource is its workforce. And the deployment of a workforce's skills and availability calls for logical processes. prime PEP for duty rosters and property protection services significantly reduces the complexity of applying these processes.

This modern software solution takes many different parameters into account and sustainably increases

the efficiency of the workforce planning. It guarantees a transparent overview and therefore the logical control and evaluation of duty rosters and property protection services. This protects resources and creates lean financial processes. And at the same time, the resulting planning quality streamlines the administrative load, resulting in deployment scenarios that match individual staff expectations.

prime PEP – the solution for:

- › Fire departments
- › Plant security
- › Security service providers
- › Guard services and personal protection providers
- › Cash and valuables transporters

Your duty roster and property protection planning is:

- › Capacity-based
- › Need-based
- › Location-based

Your benefit – your advantage:

- › Rapid and effective duty roster and property protection planning
- › Customer and staff satisfaction through fair and transparent planning
- › Avoidance of unproductive downtime resulting in expensive overtime
- › Reduced planning times through simplified working processes
- › Short software operation familiarisation times
- › Permanent cost control through clear information display
- › ROI in just a few months

Duty rosters can be created manually or automatically. The assignment of staff to rosters, properties or property-related activities can take staff wishes into account and checks the corresponding qualifications and availability.

Staff requirements, relevant restrictions or planning rules are taken into account. Comprehensive planning functions and reporting options deliver the sound, fact-based information you need for making your planning decisions.

Need-based options:

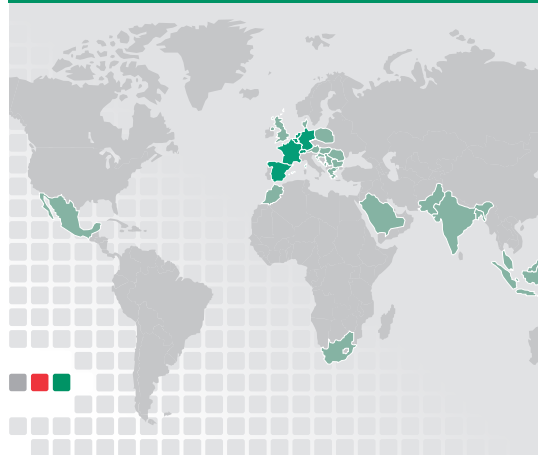

- › Route planning
- › Guard control system
- › Property planning
- › Resource planning (vehicles, equipment, etc.)
- › “Rapid Reaction Force”
- › Plausibility checks
- › Variable time accounts with threshold and limit values
- › Unlimited number of work time models:
(part time, shifts, on-call / standby duty, etc.)
- › Control over staff costs and budgets
- › Shift assignment over variable time periods
- › Integration of electronic personnel files
- › Employee Self Service (ESS)
- › etc.

Secure planning quality for:

- › Property-related activities and times
- › Automatic sequence planning
- › Planning periods
- › Defined roster times
- › Working contracts, Service agreements,
Company pay agreements, H&S guidelines, etc.
- › Downtimes
- › Alternative shifts
- › On-call / standby duty, etc.
- › Special duties
- › Familiarisation times
- › Minimum / maximum manning levels
- › Staff qualification
- › and much more besides

Efficient controlling tools:

- › Property deployment check
- › Departmental overview
- › Roster time assignment
- › Infringements of working time regulations
- › Overtime overview
- › Holiday planning and overview
- › Property-based information about the status,
property type, activity description, team strengths, etc.
- › etc.
